Our professional spay/neuter includes:

- A comprehensive physical exam
- Preanesthetic health screen
- Closely Monitored Anesthesia
- I.V Catheter and Fluids
- Sterile spay/neuter procedure
- Pain management package, which includes pain management drugs both during the procedure and take home medications for the days immediately after.
- Therapeutic laser treatment of the surgical site post procedure. This helps decrease post surgical pain at the incision site and aids in quicker healing.
